Academic Projects

Title: E-Commerce

- **Description :** This Project is about Online Shopping order the products like electronics, Fashions, Accessories
- there is a two way of order one is online payments and another one is Cash-on delivery
- modules are signup, login, payment, orders, adminpage etc
- I have used backend for this project is sqlite3, frontend html,css,bootstrap and javascript, middleware language is Python and Django Framework.

Title: Bank Management System

- **Description :** This Project is about banking application which monitarize by the staff's
- where staff can do operations like user account creation, modification, deletion, fund transfer, view the transactions, deposit and withdraw the money etc.
- print the transactions in pdf format or using printer and i provided messaging feature using gmail
- technologies used dot net framework in that vb language for database sql

Mini Projects

Title: Todo List
- **Description :** This Project is about users can add list of tasks which need to complete or things that you want to do. Most typically, they're organised in order of priority.
- Traditionally, they're written on a piece of paper or post it notes and act as a memory aid.
- so it is best solution for completeing tasks on time for this project
- i have used technologies like html, css, javascript, Hibernate, Servlet and mysql
